Millennium Healthcare provides you with healthcare providers who not only fight diseases but strengthen the life force within your body. Millennium Healthcare is different than other holistic centers because it encompasses the entire range of medicine to spiritual healing. Many of our providers have been practicing holistic medicine for over a decade. They draw upon their holistic knowledge and experience to compliment their expertise in Western Traditional Medicine. But unlike many other holistic practitioners, they know the benefits of Traditional Medicine and are licensed to use it appropriately.

Our philosophy at Plastikos MedSpa is to provide you with state-of-the-art non-surgical enhancement treatments in our relaxing spa environment. **ActiPatch™**

ActiPatch™ helps relieve bruising, swelling and discomfort. ActiPatch™ is clinically proven safe & effective for continual use, day & night, for the relief of chronic or acute pain, inflammation and swelling.

ActiPatch™ causes a reduction in the swelling (‘edema’) and inflammation that occurs after tissue injury, a true and beneficial acceleration in the inflammatory process which occurs in virtually all wounds and tissue injuries, and which, is an integral component of normal healing.

ActiPatch™ facilitates improved micro-vascular blood circulation for damaged tissue. The result is faster clearing of edematous fluid, and more rapid elimination of noxious agents (nitrous oxide, histamine, etc.) that are released into the surrounding tissue following an injury.

These mechanisms provide an environment in which cell-to-cell communication is re-established in the area of the injured tissue. This provides a well-demonstrated and significant overall improvement in the restorative and recovery process following injury.

As a result of the above changes, a decrease in the pain associated with soft tissue injury often occurs.

### Integrated Massage Therapy

**Aromatherapy Massage**
A specialized massage that provides relaxation utilizing a customized blend of pure essential oils that nourish muscle tissue, improves circulation, and revitalizes dehydrated skin. Each oil has its own unique and healing properties to benefit the body, mind and spirit. Receive a full body massage with an aromatherapy scent of your choice.

**Deep Tissue Massage**
Deep tissue massage releases muscle tension and eliminates knots and twinges. Our Deep Tissue Massage targets the deeper layers of muscle and connective tissue. Our Licensed Massage Therapist uses slower strokes or friction techniques across the grain of the muscle. Release all your tension and feel like a new person when you’re done.

**Lymphatic Massage**
A Lymphatic Massage works on connective tissues. *It is not a muscle massage.* Our Licensed Massage Therapist uses very light pressure as well as long gentle rhythmic strokes and soft pumping movements in the direction of the lymph nodes. It is good for fighting infection and speeds up the healing process. A Lymphatic Massage boosts the flow of lymphatic fluids throughout the body, refreshing your immune system and flushing out unwanted toxins. Not recommended patients with silicone implants.

**Reflexology**
Reflexology focuses only on your hands and feet. Obtained by applying pressure to certain points that correspond to other organs and areas of the body the practice of Reflexology results in a balanced nervous system.

**Reiki Massage**
Reiki means “Universal Life Force Energy”. It is one of the more widely known forms of healing through direct application of Chi. Reiki Massage is used to help patients manage pain and increase your overall quality of living. In Reiki Massage, our Licensed Massage Therapist’s hands remain still and the energy is sent to the patient.

**Swedish Massage**
Swedish Massage is the most commonly used massages. It promotes relaxation, improves circulation and relieves muscle pain. A Swedish Massage uses long flowing strokes, circular pressure, kneading and percussion strokes.

**Trigger Point Therapy**
Trigger points are tight fibers within the muscle tissue that usually refer pain somewhere else in the body. Trigger points are caused from trauma or injury. They may lie dormant, but given the right stimulus activate. Trigger point massage interrupts the cycle of pain. Isolated pressure is held on a trigger point several times (for 8-10 seconds) during a session to break the cycle. This massage reduces pain and discomfort, while eliminating toxins from the tissues.
Ion Magnum
The Ion Magnum is the next generation of Arasys -- This treatment provides an effortless workout that gets straight to the fat burning stage without the gym burnout. The Ion Magnum procedure utilizes fat as an energy source. It bypasses aerobic (requiring oxygen) glucose burning as well as the anaerobic (without oxygen) energy supply process that converts pyruvic acid molecules to lactic acid.

LipoMassage™ by Endermologie®
LipoMassage™ by Endermologie® is the latest generation of the Endermologie® treatments dedicated to localized fat, cellulite, saddlebags, flabby arms, belly rolls, double chin, love handles, potbelly stomach, fleshy pectorals. With major technological and protocols innovations, LipoMassage™ is able to produce faster and more targeted results. LipoMassage™ makes your ideal physique attainable. Males and females store fat differently and in different places. However, both men and women can successfully fight fat with LipoMassage™, when even the strictest diets and most rigorous of exercise regimens have failed. Genetically predisposed to fat storage (in anticipation of pregnancy and breastfeeding), women begin acquiring figure defects as early as adolescence. After pregnancy and with the onset of age, skin loses elasticity and resilience and the condition worsens... LipoMassage™ effectively treats these factors.

Mission Statement

Plastikos Surgery Center began as a vision of a healing space where state of the art surgical technology could be combined with compassionate care and holistic healing modalities. Our goal is to ensure that each patient receives the highest quality care while enjoying special attention in a private serene setting. The facility’s design features soothing waterfalls, full spectrum lighting, and therapeutic music which helps provide an environment conducive to healing.

Plastikos Surgery Center has board certified surgeons and anesthesiologists with state of the art surgical and anesthesia equipment. This level of accreditation assures that all aspects of your care at Plastikos will be at the highest levels of safety and competence.

We provide a full spectrum of leading edge cosmetic and reconstructive procedures, including laser surgery. What distinguishes our center from other centers is our ability to handle complicated procedures such as hand and microsurgery. We are able to offer major reconstructive surgery including breast, facial, and hand surgery to be performed in our fully equipped operating rooms.

As part of our comprehensive healing philosophy, Plastikos offers skin care and aesthetician services, a holistic weight management and nutritional program, lifestyle education, stress management and Endermologie®, a non-surgical treatment for body contouring and cellulite. Special services offered by Plastikos are the energy techniques practiced by the doctors and nurses, which are effective in reducing pre- and postoperative stress and discomfort.

At Plastikos we strive to humanize and demystify plastic surgery through patient education and a caring, thoughtful environment. The most important person at Plastikos is the patient.
