Free Wellness Lectures & Special Events
Dr. Susan Kolb founded Plastikos Plastic and Reconstructive Surgery, Avatar Industries and Millennium Healthcare to create an Integrated Wellness and Beauty Approach Combining Traditional, Holistic and Natural Medicine. Plastikos began in 1995 as a vision for a healing space where surgical technology could be combined with compassionate care and holistic healing modalities. Dr. Kolb founded Millennium Healthcare to create a Holistic group practice, integrating conventional, holistic and spiritual medicine to complement Plastikos Plastic and Reconstructive Surgery. Our goal is to ensure that each patient receives the highest quality care while enjoying special attention in a private serene setting. Millennium Healthcare and Plastikos Plastic and Reconstructive Surgery are service-oriented and dedicated to providing educational opportunities for the Atlanta area through our free wellness lectures, radio shows, workshops and classes.

**About Plastikos and Millennium Healthcare**

**Dr. Susan Kolb, M.D., F.A.C.S., A.B.H.M.**

**Plastikos Plastic and Reconstructive Surgeon, Founder and CEO**

Susan E. Kolb, M.D., F.A.C.S., A.B.H.M.

The Founder of Millennium Healthcare and Plastikos Plastic and Reconstructive Surgery, Dr. Kolb is a recognized authority on spiritual medicine and energy healing, which she integrates into her practice. She is a leading international authority on Silicone and Saline Breast Implant Disease, and has developed an immune and detoxification protocol for this patient base. Dr. Kolb is Board Certified in Holistic Medicine, as well as Plastic and Reconstructive Surgery.

**Julian B. Gordon, M.D.**

**Cosmetic and Plastic Surgeon**

Dr. Gordon graduated from Amherst College and received his medical degree from New York Medical College. He then completed his general surgery training at Saint Vincent's Medical Center in New York City and went on to complete his plastic surgery training at the University of Medicine and Dentistry in New Jersey where he also served as Chief resident. Following his plastic surgery residency, Dr. Gordon did a one-year fellowship in breast and microsurgery at Memorial Sloan Kettering Cancer Center in Manhattan. Dr. Gordon was certified by the American Board of Plastic Surgery in 2005.

**Bradford Gould, M.D.**

**Board Certified Family Physician**

Dr. Bradford Gould is a Board Certified Family Physician. He attended Medical College of Georgia and graduated in 1999. He completed his internship at both St. Vincent's Medical Center in Jacksonville, FL and Greenville Memorial Hospital in Greenville, SC. Dr. Gould also has a fellowship from International Academy of Medical Acupuncture. Dr. Gould has a very diverse background with special interests in homeopathy, herbal medicine, nutrition and sports medicine. Dr. Gould provides complete family care of all ages from birth to geriatrics. Full pediatric and women's well care are also offered.

**“Dr. Mike” Greenberg, D.C.**

**Allergy Elimination, Sports & Holistic Chiropractor**

In his holistic practice of over 22 years, Dr. Mike built his reputation as an outstanding healthcare provider and has seen many celebrities, world class athletes and top executives. Dr. Mike is a new generation of holistic chiropractic doctor, who is treating food, environment and medication allergies. In 1996 “Dr. Mike” was awarded a United States patent for a rare Multi Herbal/Vitamin formula. He has taken numerous Post-Graduate courses and seminars in nutrition as well as having a Naturopathic certification.

**Julie Anthony, R.T. (R)(M)**

**Permanent Makeup Artist**

Julie is certified in permanent cosmetics, radiology, and mammography and has been working as a medical professional since 1995. She has completed hundreds of procedures, specializing in lips, eyebrows, hairline stroke eyebrows, eyeliner, eye enhancement procedures, mucosal liner, scar camouflage, corrective procedures, vitilgo, areola pigmentation and stretch mark camouflage. Julie Anthony is held in high regard throughout the southeast for her expertise, professionalism, and knowledge.

**Cindy Stockton, L.M.E., L.M.T.**

**Licensed Medical Esthetician and Massage Therapist**

Cindy Stockton, L.M.E., L.M.T. is a licensed Medical Esthetician and Massage Therapist with over 21 years experience in medical aesthetics and integrated massage therapy. Cindy utilizes her exceptional knowledge of anatomy, cosmetic chemistry, skin structure and function to give each patient a personalized program to meet individual needs. She provides results oriented treatments that focus on skin rejuvenation, including acne and anti-aging treatments, reducing the look of cellulite and repairing sun-damaged skin.

**Nadya Dhanani, C.C.H., B.H.M.S.**

**Classical Homopath**

Nadya Dhanani, C.C.H., B.H.M.S. studied at the Homeopathic medical college associated with Bombay University in India for five and half years. She received her Bachelors of Homeopathic Medicine and Surgery in 1987 after completing her internship in General Medicine, Pediatrics, Skin and Gynecology. Dr. Dhanani has practiced as a classical homoeopath for 11 years and specializes in obesity, skin conditions, mental disorders, respiratory problems and children's health issues. This provider does not diagnose and/or treat diseases. For all diseases and/or treatments, please see one or more qualified practitioners.

I am certified in Classical Homeopathy by the Council for Homeopathic Certification, a national organization supporting excellence in classical Homeopathy. Additionally, I am a graduate of the five-year program from the University of Mumbai and have many years of experience as a Homeopath treating diverse community. For many years, people have asked about homeopathy and remedies when encountered with emergency situations. Just recently my family encountered a traumatic bike crash where one of my family members were seriously injured. Arnica given every hour reduced the swelling, bruises and discoloration. Hypercium helped immensely with the facial paralysis due to nerve injury. This has not only strengthened my faith but also my belief that Homeopathy works and works best when given correctly. Here is a short list for everyone to keep at home until you reach your Physician or the emergency room.

**Arnica:** is the most common remedy for all kinds of injury. In addition to being used orally, it is also available as a topical cream. It is recommended for falls, bruises, sprains, or injury with a heavy object. It is the initial recommended remedy until medical help is available to you.

**Hypericum/St John’s Wart:** is used when the nerve is involved or injury with a sharp object such as a kitchen knife or razor.

**Symphytum:** is used when there is a dislocation, sprain or fracture to mend broken bones.

**Ledum:** is used for puncture wounds including those from nails, (animal teeth) bites and rusty objects.

**Apis:** is the most common remedy for bee stings

**Calendula Gel:** apply homeopathic Calendula gel to any minor skin irritation. It makes burns and abrasions heal quickly.

For appointments please call Millennium Healthcare at: (770) 457-4677
Abraham-Hicks Law of Attraction
Meetup Group

Join Us Every Wednesday Evening!

CHANGE YOUR LIFE IN 1 HOUR!
Our weekly Meetup Group is based solely on the teachings of Abraham-Hicks, Bashar, The Law of Attraction, Art of Allowing and Deliberate Co-Creating. Each week, we watch 15-30 minutes of Video as Esther Hicks & Darryl Anka bring forth the non-physical, pure positive energy of Abraham and Bashar, in discussing real life questions of attendees, from their workshops around the world. A new video clip and topic, is shown each week. Then, as a group we discuss the information and apply it. Similar to the original Abraham-Hicks workshops, we also have a "hot seat", where you can come forward and ask your personal question, to be discussed by the group, helping you sort out your personal solutions. Isn’t this fun! This group is non-denominational, regardless of your religion, beliefs or spirituality.

The purpose of this Meetup Group, is to help assist you in Deliberately Creating and Allowing the life you want - whether it’s your Money, Love Relationships, Career, Business, Family, Health, and most of all – your Happiness. You’ll also hear personal life stories, of how others have manifested both “Wanted” and “Unwanted” things in their life – and benefit by their experiences. The powerful energy of Abraham & Bashar is present at our meetings, due to the group dynamic.

*Kent brings forth the non-physical, pure positive energy of Abraham and Bashar, in his teachings and sessions.

FREE to the Public. (Suggested Donation $10 min.)

Meets Every Wednesday Evening 7:30 – 9:30 PM (EST)
Millennium Healthcare – Plastikos Plastic Surgery Center
4370 Georgetown Square | Atlanta, Georgia (USA) 30338

Plastikos Men’s Anti-aging, Regenerative and Aesthetic Medicine Center

Breakthrough treatments in anti-aging and regenerative medicine and new minimally invasive plastic surgery procedures to help turn back the clock are featured weekly in the media. Plastikos and Millennium Healthcare have brought together medical and surgical physician specialists that focus on these regenerative programs and procedures to help men regain their youthful energy and appearance. Plastikos Surgery Center, located in Dunwoody, is certified by the state of Georgia as well as by the Joint Commission, the highest level of certification available for outpatient surgery centers. Plastikos was the first plastic surgery center certified in Georgia by JCAHO in 1999 and has an excellent history of safety since its establishment in 1995. With MD anesthesia (the Kennestone anesthesia group) and experienced plastic surgeons and OR staff, your surgical experience is private and professional.

As most insurance plans are accepted by our medical providers, why not schedule a consultation to see what steps you can take to “turn back the clock” both in the way you feel and the way you look? Although most cosmetic surgery is not covered by medical insurance, some procedures such as gynecomastia (or reduction of male breasts) or upper eyelid lift and brow may be covered.

Anti-aging and Regenerative Medicine

Anti-aging and regenerative medicine incorporates some of the latest advances in anti-aging medicine including reversing what causes illness, what causes the decline in physical and mental function as we age. Dr. Brad Gould, board certified in family practice, uses an individualized approach to slow and even reverse the signs and symptoms of aging. This offers an improved quality of life and not just a longer life, by looking at some of these internal causes, including hormone and neurotransmitter imbalances and deficiencies. The primary goal is to improve health and well being with proper diet and lifestyle counseling along with live source food based nourishment. The goal is help ne age as gracefully as possible and maintain one’s health and youthful energy. A comprehensive approach that includes (but not limited to) areas of nutrition, lifestyle, exercise, weight management, heavy metal toxicity, functional medicine, bioidentical hormones, comprehensive lab analysis are all important areas with regard to anti-aging of the body of its cells, tissues, and organs. All the above help to address several different areas of improving the body physiology and one’s health.

Plastic Surgery Procedures

Dr. Julian Gordon, board certified in plastic surgery, offers the following plastic surgery procedures:

Liposuction:

Many men accumulate fat in areas that are resilient to diet and exercise. Two of the most common areas are the abdomen and flank. The excess deposits of fat can be removed with a simple procedure called liposuction. This procedure involves making a few very small incisions in the skin and using a tubular canula (similar to a long straw) to suction out the excess fat cells. The procedure is often done under local anesthesia and avoids the risks and costs of general anesthesia. The patient typically will take 2-4 days to recover and the results are seen within weeks of the surgery. Liposuction is one of the most popular cosmetic procedures in the world with a very high patient satisfaction rate.

Gynecomastia:

The growth of breast tissue or fat in the breast of men can be due to medical issues or simply be due to your genetics. If medical treatment does not correct the aesthetic appearance of your breasts, surgical excision is indicated. The procedure involves removing the breast tissue through a small incision below the areola with liposuction of the excess fat. This restores the normal contour to the chest and reveals the curves of the pectoralis muscle. Most patients can return to work days after surgery.

Milennium Healthcare Event
When Things Go Wrong: Homeopathy for Emergency
By: Dr. Nadya Dhanani
7:15 p.m. at
Our Office
4370 Georgetown Sq.
September Events at Millennium

Please join us for our September Noetic Sciences meeting on Thursday, September 18th at 7:15PM at 4370 Georgetown Square, Atlanta, GA 30338. Our guest presenter will be Sofia Wellman. She will be providing a free film screening of, “Death as Life.” It’s a 70 minute documentary that always invokes an interesting conversation afterwards! Hope to see you there!

Death is a taboo subject but it happens to all of us. No matter who you are or what stage of life you are in, Death as Life is a friend who is here to make living a little easier. Most of us do not want to discuss it. We tiptoe around it, try to circumvent it, or use euphemisms. Our loved ones did not die; they “passed away,” “went to a better place,” or “moved on to their great reward.” Maybe we think we can avoid death, but no one can and death is not limited to physical death. It comes in many forms. We can experience the death of a dream, the death of a relationship, the death of our youth, the death of our health, and any other number of significant changes that forces us to grapple with impermanence. Though we fear it, if we do not face and accept death, the fear can become an even heavier load that saps the energy out of life!

Please join us for our September Millennium Healthcare Event meeting on Tuesday, September 23rd at 7:15PM at 4370 Georgetown Square, Atlanta GA 30338. Our guest speaker will be Dr. Nadya Dhanani and she will be discussing When Things Go Wrong: Homeopathy for Emergency.

Conventional medicine treats physical injuries with mechanical means, ranging from ice packs to surgery, and uses pharmaceutical drugs for pain. Homeopathy can add several other benefits without resorting to drugs, such as: reducing pain, bruising, swelling and the risk of infection, while accelerating healing. It assists with the healing of scars, physical misalignments, and microscopic tissue damage or tension that otherwise might be left unattended. If left untreated, these issues can eventually lead to imbalances and progressive malfunction. The body’s cells remember the injuries years down the road and can continue to behave as if the injury still exists. On an emotional level, scarring can remain as well. Homeopaths believe their remedies can reach into these levels to bring deep healing.
Rhinoplasty:

Many men have contour or size issues with their nose. Rhinoplasty is the reshaping of the nose. This can involve making the base of the nose more narrow, flattening a “hump” or changing the appearance of the tip. The nose is an essential part of your appearance and can improve your look with a simple outpatient procedure. The recovery from a rhinoplasty is rapid but bruising may be present for 7-10 days.

Blepharoplasty:

As we age, the lower lids bulge and the upper lids begin to hang. This gives a tired, “heavy” look. A blepharoplasty is a short procedure that removes excess skin and fat from the eyelids. This can drastically improve your appearance and make you look younger. The recovery from this procedure is quick with little or no post procedure pain but bruising can last 7-10 days.

Buttock Enhancement:

As men age, we lose projection and definition in the buttock region. This creates a “flattened appearance”. The full curvature of the buttock can be restored or enhanced with either implants or fat transfers. With implant augmentations, a solid silicone implant is placed above the gluteus muscle through two small incisions in the buttock crease. The procedure is short and the recovery is quick with most patients returning to work days after surgery. Fat grafting has the advantage of using your own tissue and an added bonus of losing fat on the abdomen/flanks from liposuction there. The recovery from this is also quick with minimal discomfort. With fat grafting, the patient must not sit or sleep on the grafted area for two weeks following the procedure. Both procedures have a very high patient satisfaction rate.

Pectoral Implants:

Augmentation of the chest is not just for women. Solid silicone implants placed behind the pectoral muscle can instantly enhance the appearance of the male chest. This is a short simple procedure that can significantly improve the muscular appearance of the male torso. The recovery from the procedure requires limited physical activity for a few weeks after the procedure but patients can return to work the day after surgery in many cases.

Chin Implants:

An important feature of a masculine face is a “strong chin”. Enhancement of this area with a silicone chin implant is a simple outpatient procedure with very little recovery time. Minor swelling typically lasts for a few days to weeks but most patients return to normal activities within days of surgery.

Face/Neck Lifts:

One of the most obvious signs of aging is laxity of the skin in the face and neck. Face/Neck lifts are performed as an outpatient procedure and typically take about 4 hours to perform. The procedure involves incisions along the sideburns in front and behind the ear and in the hairline behind the ear. The skin is tightened and the excess is removed. There is little to no pain involved and the results can dramatically improve your appearance, often “turning back the clock” 5-10 years. The recovery is generally 1-2 weeks.

Deep Facial Peel:

Many men do not appreciate the importance of good skin tone. A deep facial peel that causes the damaged cells on the surface of the skin to shed can improve the skin texture and normalize the skin color. Peels also induce the production of collagen and elastin in the deeper layers of the skin which reduce the “wrinkles” and can take years off your appearance. Depending on the depth of your peel, the recovery ranges from a few days to a few weeks. Other plastic surgery procedures include: Brow lift, Otoplasty (ears pinned back), Abdominoplasty (tummy tuck).
For those men who want less invasive procedures that can delay the need for more extensive plastic surgery, we recommend:

**Perfector**—non-invasive skin rejuvenation device that lifts sagging muscles and builds collagen transforming the skin with a youthful glow. The Perfector utilizes non current delivered via high definition wave forms to affect cell processes such as increasing collagen, elastin, cell proliferation, blood circulation and stimulating muscle memory. This procedure is also known as a non-surgical face lift—or micro current technology. During the treatment, a conductive gel is placed on the face and neck. A set of probes are moved across the skin in a series of six programs, each targeting a different condition and each using a different waveform. The treatment is very relaxing and takes about 45 minutes. A series of 10 treatments is recommended ideally performed twice a week. After that, maintenance is recommended to maintain results, typically every six to eight weeks. This technology can also be used one to two days prior to a special event to add a lift and glow to the skin. However, if used on a one time basis, results are not cumulative.

**Microdermabrasion**—is an anti-aging treatment that lightly exfoliates the skin and stimulates collagen. A slightly abrasive device that also has suction is used to “sand” the skin and the suction aspect allows for increased circulation to the treated area stimulating cell function and collagen. It improves the appearance of fine line and wrinkles, treats age spots and hyper pigmentation, improves acne and scars left by acne, and improves the texture of the skin. There is no down time and is safe for all skin types.

**Lila Laser**—fat reduction and skin tightening. During the treatment, Lila uses low-level (cold) laser technology to painlessly melt fat within the fat cells. The fat is released through pores that develop within the cells and is then processed naturally through the lymphatic system. The process is similar to exercise. When a person exercise, triglycerides are released from the fat cells. The more exercise, the smaller the fat cells (adipocytes) become. Lila Body Contouring works in much the same fashion by pulling the triglycerides from the fat cells. This results in millions of fat cells becoming smaller so inches are reduced off the waist, hips and thighs. The fat cells are not injured in any way by this process. Lila Body Contouring along with following the recommended guidelines for success averages a loss of 2 or more total inches on average in the abdomen. The results may vary depending on the build of an individual and how much fat is in the desired area. Skin tightening is an additional benefit of Lila Laser.

**Ion Magnum**—the Ion Magnum is a non-invasive body sculpting treatment that works for people of any age and any weight. No diet required and no side effects! The Ion Magnum uses electrical current to stimulate muscles. The electrical current improves your nerve connection to your muscles. It also improves the body’s ability to release growth and thyroid hormones. When coming in for treatment, you will be asked to lie down and will then be wrapped comfortably in electrodes. After being wrapped, the technician will power the machine on and you will begin to feel contractions on your muscles. The machine consists of different level and frequencies. The levels are set to your fitness and can’t be adjusted throughout your treatment.

**Laser Treatments**—laser treatments include hair removal, treatment of pigmented and vascular lesion, spider vein removal, fine wrinkle remove, acne scar treatments, rosacea treatments and stretch mark reduction.

**Facial Fillers and Neurotoxin Treatments**—for a variety of facial fillers (Restylane, Radiesse, Perlane-L, Juviderm) are used for line wrinkles. Botox and Dysport are given for facial wrinkles and lift the eyebrows for unwanted facial wrinkles. Deep labia folds and filling in areas of the cheeks, lower eyelids and chin that has lost volume due to aging.

While we do focus on providing expertise in both medical and surgical management, we also strive to take meticulous care of the patient and the entire plastic surgery/anti-aging enhancement experience. Our goal is to ensure that each patient receives the highest quality surgical and medical care while enjoying special attention in a private serene setting. We offer what no other alternative health facility in this country offers. We are a center of excellence for interdisciplinary complementary healthcare providing both medical and surgical services in one location.
Tips to Conceal Under Eye Circles with Jane Iredale Concealers

*Jane Iredale’s Active Light Concealer and Highlighter* is great for banishing dark under-eye circles and bringing light to the face. The formula is light and refracts light to create a soft focus effect. It provides sheer to medium coverage, so if you need heavy duty coverage, *Jane Iredale’s Circle Delete* is a better choice.

- A little bit goes a very long way. If it is creasing, you have applied too much. Just pat at the concealer with your ring finger to smooth it out and use a little less next time.
- If you have a few extra fine lines around the eyes, start applying just a little bit down/away from your tear duct. Somehow those rascally little crinkles are worse right under the eye, and are best avoided. You will get the same lightening/brightening effect with fewer opportunities for accentuating fine lines.
- The inner corner of the eye, on the side of the bridge of the nose is a great place to add light. It wakes up your eyes and brightens your whole face.
- Remember the corners of the nose, around the nostrils. If you have any redness there this is the #1 trick for creating a flawless-looking complexion.
- Active Light is a great highlighter for the tops of cheekbones, down the center of the nose to the top of the cupid’s bow of the lips.

Supplements of the Month: Zeo Gold

Reduce Toxic Body Burden

Toxicity from food and water contributes to every major disease. Zeo Gold from Longevity Plus is designed to potentially help you get rid of those toxins.

Toxic body burden or TBB is the term now being used to describe the negative effects of toxic heavy metals and synthetic chemicals our bodies come into contact with. Zeo Gold may assist your body in removing all of that naturally.

Product Details:
- Naturally enhanced Zeolite
- Previously unavailable Hydro colloidal particle
- Higher cation exchange capacity (CEC) for metal removal
- Listed as GRAS for human consumption
- For use with drinking water

You can buy Zeo Gold at Millennium Healthcare:
- $34.43
- For more information call (770) 457-4677 ext 1120

Do You Want Sexy Eyelashes?

There’s a new innovation in Eyelashes! It’s called Latisse. Latisse Solution, is a prescription treatment for hypotrichosis (another name for having inadequate or not enough eyelashes) that is used to grow eyelashes — Thus, making them longer, thicker and darker! The results of Latisse, are gradual. The majority of users have seen significant improvement within 2 months. Latisse is very easy to use. You apply it with a sterile applicator, (which comes in the kit) - “once nightly”, in order to clean the lashes. Complete instructions and patient education are provided at time of purchase. Get yours Today!
