ABOUT OUR PRACTICE:

Dr. Susan Kolb founded Plastikos Plastic and Reconstructive Surgery, Avatar Industries and Millennium Healthcare to create an Integrated Wellness and Beauty Approach Combining Traditional, Holistic and Natural Medicine. Plastikos began in 1995 as a vision for a healing space where surgical technology could be combined with compassionate care and holistic healing modalities. Dr. Kolb founded Millennium Healthcare to create a Holistic group practice, integrating conventional, holistic and spiritual medicine to complement Plastikos Plastic and Reconstructive Surgery. Our goal is to ensure that each patient receives the highest quality care while enjoying special attention in a private serene setting. Millennium Healthcare and Plastikos Plastic and Reconstructive Surgery are service-oriented and dedicated to providing educational opportunities for the Atlanta area through our free wellness lectures, radio shows, workshops and classes.

Bradford Gould, M.D.
Board Certified Family Physician

Dr. Bradford Gould is a Board Certified Family Physician. He attended Medical College of Georgia and graduated in 1999. He completed his internship at both St. Vincent’s Medical Center in Jacksonville, FL and Greenville Memorial Hospital in Greenville, SC. Dr. Gould also has a Fellowship from International Academy of Medical Acupuncture. Dr. Gould has a very diverse background with special interests in homeopathy, herbal medicine, nutrition and sports medicine. Dr. Gould provides complete family care of all ages from birth to geriatrics. Full pediatric and women’s well care are also offered.

“Dr. Mike” Greenberg, D.C.
Allergy Elimination, Sports & Holistic Chiropractor

In his holistic practice of over 22 years, Dr. Mike built his reputation as an outstanding healthcare provider and has seen many celebrities, world class athletes and top executives. Dr. Mike is a new generation of holistic chiropractic doctor, who is treating food, environment and medications allergies. In 1996 “Dr. Mike” was awarded a United States patent for a rare Multi Herbal/Vitamin formula. He has taken numerous Post-Graduate courses and seminars in nutrition as well as having a Naturopathic certification.

Julie Anthony, R.T. (R)(M)
Permanent Makeup Artist

Julie Anthony is held in high regard throughout the southeast for her expertise, corrective procedures, vitiligo, areola pigmentation and stretch mark camouflage. She has completed hundreds of procedures, specializing in lips, eyebrows, hairline stroke eyebrows, eyeliner, eye enhancement procedures, mucosal liner, scar camouflage, corrective procedures, vitiligo, areola pigmentation and stretch mark camouflage. Julie Anthony is highly regarded throughout the southeast for her expertise, professionalism, and knowledge.

Amber Looper
PA-C, MMSC FAAOT

Amber Looper is a Board Certified Physician Assistant specializing in natural pain relief and ozone therapy. She earned a Bachelors degree in Biology degree in Biology with minors in Chemistry and in French Language from UGA. She attended the Universite’ de Paris Sorbonne in Paris. In 2013 Amber took three training courses with Dr. Frank Shallenberger earning certificates in ozone insufflation and IV therapies and advanced training in prolozone joint injection therapies and techniques.

Susan E. Kolb, M.D., F.A.C.S., A.B.H.M.
Plastikos Plastic and Reconstructive Surgery

The Founder of Millennium Healthcare and Plastikos Plastic and Reconstructive Surgery, Dr. Kolb is a recognized authority on spiritual medicine and energy healing, which she integrates into her practice. She is a leading international authority on Silicone and Saline Breast Implant Disease, and has developed an immune and detoxification protocol for this patient base. Dr. Kolb is Board Certified in Holistic Medicine, as well as Plastic and Reconstructive Surgery.

Dr. Kolb is the Author of:
The Naked Truth About Breast Implants: From Harm to Healing

A Contributing Author of:
The Goddess Shift: Women Leading for a Change

Cindy Stockton, L.M.E., L.M.T.
Licensed Medical Esthetician and Massage Therapist

Cindy Stockton, L.M.E., L.M.T. is a licensed Medical Esthetician and Massage Therapist with over 21 years experience in medical aesthetics and integrated massage therapy. Cindy utilizes her exceptional knowledge of anatomy, cosmetic chemistry, skin structure and function to give each patient a personalized program to meet individual needs. She provides results oriented treatments that focus on skin rejuvenation, including acne and anti-aging treatments, reducing the look of cellulite and repairing sun-damaged skin.

Nadya Dhanani, C.C.H., B.H.M.S.
Classical Homeopath

Dr. Nadya Dhanani, C.C.H., B.H.M.S. studied at the Homeopathic medical college associated with Bombay University in India for five and half years. She received her Bachelors of Homeopathic Medicine and Surgery in 1987 after completing her internship in General Medicine, Pediatrics, Skin and Gynecology. Dr. Dhanani has practiced as a classical homeopath for 11 years and specializes in obesity, skin conditions, mental disorders, respiratory problems and children’s health issues. This provider does not diagnose and/or treat diseases. For all diseases and/or treatments, please see one or our Licensed Medical Doctors.

Julie is certified in permanent cosmetics, radiology, and mammography and has been working as a medical professional since 1995. She has completed hundreds of procedures, specializing in lips, eyebrows, hairline stroke eyebrows, eyeliner, eye enhancement procedures, mucosal liner, scar camouflage, corrective procedures, vitiligo, areola pigmentation and stretch mark camouflage. Julie Anthony is held in high regard throughout the southeast for her expertise, professionalism, and knowledge.

*Optimism! Cultivating the Magic Quality that Can Extend Your Lifespan, Boost Your Energy, and Make You Happy Now*

Susan Kolb, M.D. is a contributing author for Optimism! With co-authors including Jimmy Carter, Steve Jobs, Meryl Streep, Queen Noor, Charles, Prince of Wales, and others. In this new anthology, world-famous leaders from every sphere of human endeavor reveal the secrets that kept them going during the tough times.

About the Author:

Susan E. Kolb, M.D., F.A.C.S. the founder of Plastikos Surgery Center and Millennium Healthcare in Atlanta, Georgia, has developed treatment protocols to help women with silicone, chemical and biotoxicity problems from breast implants. She has the personal experience with the illness and first used the protocols to regain her own health.

Electromagnetic fields (commonly referred to as EMFs) are all around us no matter where we live. They emanate from power lines, televisions, electrical wiring, microwaves, and other electronic devices. Additionally, we are exposed to information-carrying radio waves through cell phones, cell phone towers, TVs, and wireless Internet connections. What effects might these invisible electromagnetic waves have upon our tangible health?

When I heard that some people had been diagnosed with cancer caused by cell phones, I thought it was a bunch of poppycock. However, now that I am treating people with all types of allergies and sensitivities on a daily basis, I realize some folks really are sensitive to the unseen waves emitted by electronic devices. Disease can result when the body's electromagnetic field has been disturbed. We've known for quite a while that x-rays have a negative effect on individuals and those who work around these x-ray machines wear protective clothing to avoid radiation.

Electro-magnetic fields have been officially recognized as a legitimate health hazard and are not a psychological issue. Government agencies have long debated the damage humans can receive from EMF exposure, but Sweden acknowledged this problem some five years ago. Sweden is leading the pack in acknowledging and dealing with this issue, mainly due to the progress made by The Swedish Association For The Electrosensitive. The association produces and distributes educational literature that has helped raise awareness about the electromagnetic phenomenon around the world. Similar work is being done in Great Britain, as well as the Electromagnetic Radiation Alliance in Australia.

Do you spend hours in front of a computer? And at the end of the day, you just don't feel right? Then you may be reacting to EMFs! Symptoms can also include dizziness and irregular heartbeat or heart palpitations, headaches, itchy skin. Do you often feel - out of sorts? Are you forgetful? Do you find it difficult to concentrate? If so, you may be electro-magnetic sensitive.

On top of the electro-sensitivity problem, there is evidence that EMFs may cause cancer, fibromyalgia, and miscarriages. http://electromagnetichealth.org/ is a group that represents citizens who are concerned about the proliferation of wireless technologies and their impact on health. Their Web site lists numerous illnesses linked to electromagnetic radiation exposure, which include:

- Many types of cancer
- Neurological conditions
- Sleep disorders
- Cognitive problems
- Hormone disruption and fertility impairment
- Immune system disorders
- Metabolism changes
- Feeling anxious even when you are not stressed
- Dizziness

What Can You Do to Protect Yourself and Your Family? First, you need to understand that over time your nutrition and your daily lifestyle can either make you healthy or sick. Maintaining a proper diet filled with vegetables, fruits, nuts and grains, and sparingly eating lean meats, and avoiding toxins such as sugar and alcohol will put your body in better condition to resist disease. Regular exercise helps to detoxify the body and eliminate free radicals.

Second, educate yourself on this topic. For parents, I recommend reading books by Doris Rapp, MD. For the scientifically minded, I recommend Dr. Robert Becker's book, Cross Currents, The Perils Of Electro-Pollution. Find more information on the Internet and at the National Institute of Environmental Sciences.

Third, spend less time watching TV or move back farther from the screen. Turn off TVs, computers, and other electronic devices when they are not in use. Limit cell phone time and microwave use.

Fourth, as a holistic healthcare provider, I can determine whether you are electro-magnetically sensitive. If you react to electromagnetic fields, your body can be naturally reprogrammed in a few sessions to be non-reactive to the hazardous effects of EMFs and help you prevent disease caused by the negative side of advanced technology.
Prolozone is a homeopathic/oxygen injection technique. It is excellent for all forms of musculo-skeletal and joint pain including chronic neck and back pain, rotator cuff injuries, degenerative and arthritic hips and knees, degenerated discs, and shoulder and elbow pain. The good thing about Prolozone is that because it actually corrects the pathology of the disorder, there is 75-80% chance for the chronic pain sufferer to becoming permanently pain free.

What is Prolozone?

Prolozone is derived from the Latin word “proli”, which means to regenerate or rebuild and the word “ozone”. Ozone is the most highly active form of oxygen in the universe. Prolozone uses the power of oxygen to cause damaged tissues, joints, ligaments and tendons to regenerate.

How Does Prolozone Work?

The reason that some injuries completely heal and others don’t has to do with circulation. In order for a damaged area of the body to regenerate and heal, it must have the critical elements that only blood can provide: vitamins, minerals and oxygen.

Of these, by far, the most important is oxygen. Low levels of oxygen cause an accumulation of lactic acid, which is what causes pain. Prolozone works in three ways. First, homeopathic anti-inflammatory medications are injected into the injured area to reduce inflammation and swelling. This leads to increased circulation. Next, the area is treated with vitamins and minerals that are critical for healing. And finally the area is infiltrated with oxygen in the form of ozone. The result is that the tissues get what they need to heal. And as they heal, the circulation to the area is re-established and treatment is complete. The response to treatment varies from person to person, but most people only need 5-10 treatments.

Is Prolozone The Same As Prolotherapy?

No. Prolozone uses oxygen to create a healing. Prolotherapy uses inflammation to create the healing. Although it is often effective, it had the following limitations. Prolotherapy is extremely painful. Pain usually persists for days to weeks after a treatment. Patients receiving Prolozone feel some immediate improvement, with very little to any pain at all during the treatments. Next, Prolotherapy requires many injections, whereas Prolozone is faster and much less expensive. Prolozone therapy is especially effective in regenerating the cartilage in damaged knees and hips. Prolotherapy is usually not able to do this.

Conditions That Can Be Treated With Prolozone

Prolozone works on just about any pain problem you might have, including: neck pain, whiplash, degenerated or herniated discs, low back pain, plantar fasciitis, carpal tunnel syndrome, torn tendons, TMJ syndrome, sciatica, heel spurs, neuromas, tennis elbow, rotator cuff tears, knee injuries and virtually any other sports injury. Because Prolozone treatments also result in cartilage regeneration, the technique is also remarkably effective even for severe cases of osteoarthritis of the hip or knee. The good thing about Prolozone is that is not just a treatment for pain. The result actually may represent a permanent fix.
ESSENTIAL OILS from NuYu – Pure and Extremely Beneficial for Your Everyday Life

Essential Oils have many uses. They can calm the mind, reduce anxiety, promote sleep, add energy to your day, and promote a sense of well being. They can also be used to soothe aching muscles, freshen up and de-germ. Plastikos carries the NuYu Essential Oils which are very pure. They can be diffused into the air, put in a carrier lotion and applied to the skin or mixed to make a cleaning solution or added to laundry.

Eucalyptus, Basil or Lavender – Soothes aching muscles
De-germ aid – Peppermint, Tea Tree Oil and Sweet Orange with some Aloe Vera Gel
Hyperactivity in Children – Use Lavender Essential Oil
Energy Boost – Grapefruit Oil, Basil or Ginger
Fight Anxiety – Chamomile, Lavender Oil
Strengthen Nails – Myrrh, Argon Oil
Help Fight Infection – Tea Tree Oil
Ozone Therapy is a medical therapy that has been used worldwide for over 50 years with dramatic success and safety. You will learn that it is being adopted more and more by formally ‘traditional’ medical practitioners. It is clear that Ozone Therapy works, and it is becoming one of the most useful tools in medical clinics across America and around the World.

What does it do? To briefly summarize, ozone accomplishes these very important tasks in your body:

1/ Ozone is AntiAging (some of those AntiAging effects can be attributed to the following list of actions…)
2/ Ozone Increases Oxygenation of your Cells (it has been proven that cancer and disease grow in poorly oxygenated tissues in your body).
3/ Ozone Modulates your Immune System (for those with a weakened immune system, Ozone will boost the immune system. For those with Auto-Immune Disorders, Ozone will modulate the immune system to help to stop it from attacking healthy human cells.)
4/ Ozone Increases Energy Production in your Cells (your cells need energy to be healthy; low energy levels mean that you and your cells will not be healthy and will age)
5/ Ozone Increases the Activity of your "Anti-Oxidant Enzyme Systems". This means ozone will reduce the oxidation levels of your body.
6/ Ozone Reduces the level of acidity of your body (never mind the Alkaline Water…use Ozone!)
7/ Ozone kills Bacteria, Viruses (and virtually all other disease causing organisms) on contact
8/ Ozone Kills Cancer cells on contact

The IOA - The International Ozone Association holds International Ozone Congresses every two years in various locations around the world. AEPROMO - The Spanish Association of Medical Professionals in Ozone Therapy also holds World Ozone Congresses every two years. The recent Ozone Congress held June 2012 in Madrid Spain attracted Ozone Therapy Doctors from 25 countries around the world! Countries such as Brazil, Germany, Russia, Spain, Italy, Turkey, Austria, and even the USA all have their own Ozone Therapy Associations which hold yearly conventions (Congressess) where physicians from around the world attend to present their new findings, new procedures, and results of new studies.

In 2009 there was a very public announcement in Toronto Canada, an announcement that shook the world when everyday "allopathic" medical doctors openly announced that Ozone not only can ozone be used to successfully treat herniated discs, but the studies indicate that Ozone Therapy works far better than traditional surgery!
The word is out and the door is open. Whether you are already knowledgeable about Ozone and know its value in medicine, or whether you are a skeptic, you will enjoy this site on Ozone Therapy. Review the articles posted here, learn about how ozone works, take a course from one of our many Ozone Courses. Learn.
Dear friends,

We are pleased to invite you to a one hour informative meeting and share about the latest wellness discovery. We are thrilled to offer you insights on: What is Nanoenhanced Hemp Oil? What does it have to do with our endocannabinoid system? CBD oil can effectively treat chronic pain, immune system problems and fibromyalgia. It may protect against cancer. Date: Friday, August 11th at 7:30 p.m. OR Saturday, August 12th at 10:00 a.m.

Location: 4370 Georgetown Square, Atlanta GA 30338. We look forward to seeing you there!

Millennium Healthcare
Supplements Of the Month

**Synaptol** - This supplement provides relief from issues of focus, concentration, memory, comprehension, irritability, anxiety, hyperactivity. No artificial or unpleasant flavor - homeopathic ingredients.

**American Ginseng - V**
Boosts the immune system, invigorates and rejuvenates. Allows the body to better deal with stress. It fights infections such as cold and flu. Improves digestion, low iron in the blood (Anemia) and respiratory infections.

**Kaprex** - It is a natural and safer way of dealing with joint pain, inflammation and soreness. Plant components based supplement.
NEW AT MILLENNIUM – HEALTHCARE

UrielTones SOUND FREQUENCY THERAPY

UrielTones is a non-invasive sound frequency device that recalibrates the electromagnetic field of the body at a cellular level. Our cells communicate with each other via bioelectrical signals and electromagnetic fields. Maintaining balance in those cellular electromagnetic fields is crucial to your physical and emotional health. UrielTones is very grounding, balancing, calming and nurturing.

Everything in the universe vibrates at a certain frequency unique to that thing, so each organ or cellular system has its own “resonant” healthy frequency. When the body’s electromagnetic field is chronically altered or permanently disrupted, the immune system may become compromised and illness may ensue. Restoring its natural frequency can allow that body to return to a state of optimal function. The body’s healthy cell frequencies can be altered by an accumulation of metals and toxins. Exposure to toxic EMF fields from WiFi and cell phone use have been implicated as a cause of the epidemic rise in health conditions and diseases such as depression, autoimmune disease, cancer, autism, anxiety, brain fog, inability to lose weight, etc.

Sound has the ability to affect living cells. Depending on the frequency used, sound can literally shatter and destroy a cell or return an ailing cell to healthy balance. Frequencies can kill bacteria, viruses and abnormal cells. Specific frequencies can seriously disrupt body system function, or restore those functions to optimal levels.

The UrielTones session is as follows. We first determine the frequencies that make it possible to balance the imbalances unique to your body. Then you lay on a massage table without the need to disrobe except for shoes and jewelry. Earphones are placed over your ears and pads are placed on both wrists and ankles. Two pads are also placed on the trunk of the body. The sound frequencies that were found to be beneficial to you are fed through the earphones and pads while you relax for twenty to thirty minutes. You may experience a slightly altered awareness, unusual mental clarity, a sense of deep relaxation and well being, or feelings of heat or coolness in different organs and tissues.

UrielTones Sound Therapy is contraindicated if you have a history of seizures, have a cardiac pacemaker or an implanted electrical device, or you or your child have been diagnosed with autistic spectrum disorder.

Take care of yourself and balance your body’s frequencies today! Call Millennium Healthcare at 770-457-4677 and schedule an appointment. For a limited time we are offering 25% off as an introductory special. One time use only.

$55.00 for testing         25% off introductory special   $41.25
$75.00 per session       25% off introductory special    $56.75
The following products, in liquid form, are quickly absorbed for efficient delivery. They are supplied in single dose packs making them very convenient:

**Lypo-Spheric GSH:**
Detox Chemicals. Glutathione. Boosts the immune system and maintains cardiovascular hepatic and glandular health.

**Lypo-Spheric Vitamin C:**
Collagen Disc Disease. High dose vitamin C in liquid form for most efficient delivery.

**Lypo-Spheric R-ALA**

**Lypo-Spheric GSH:**
Detox Chemicals. Glutathione. Boosts the immune system and maintains cardiovascular hepatic and glandular health.
LILA, INCH LOSS LASER TECHNOLOGY

Who Says “No Pain, No Gain?”
At Plastikos, We Say “No Pain and You Gain Inches Off Each Week With Our Lila Laser Cool Laser Technology”

Lila Laser can help slim down areas of your body that are unresponsive to diet and exercise alone, with an FDA approved technology most recently only available in Europe. Everyone knows that no matter how much you diet and exercise, there are always stubborn, localized pockets of fat that just won’t go away. While the Lila Laser technology is not a replacement for a healthy lifestyle, it can make you look and feel better.

Our Board certified Plastic surgeons recommend it for areas such as the love handles, abdomen, thighs, back, arms and neck. Lila laser, just like traditional liposuction is not a weight loss method, but it can help to reduce a thick fat pad and problem areas of unwanted body fat and tighten the skin simultaneously with its laser technology.

What is Lila Strawberry Laser?

Our trained and certified staff performs Lila Laser for patients to gradually dissolve fat and tighten the surrounding skin almost anywhere in the body. This FDA-approved, revolutionary procedure is completely non invasive which offers no bleeding, swelling and bruising and requires no recovery time compared to conventional or laser liposuction.

Lila Laser uses laser technology with absolutely no invasive surgical instruments. It is a more subtle method of thinning out the fat pad from areas of the neck, arms, abdomen, thighs and areas where the skin is slightly lax without bruising, swelling, and restricting garments.

How many Lila Laser treatments are required?

We will discuss your specific goals and the number of treatment areas in our free consultation. Generally we recommend two sessions of 20 minute treatments per week for each area for a total of 8 treatments. Some patients will opt to have the Lila Laser treatment prior to a special occasion for a smoother appearance of certain areas of the body.

What will my recovery be like with Lila laser?

Patients who receive Lila Laser treatment are back to work after the procedure. You may resume exercise and other activities immediately after the procedure.

How is it done?

After a thorough consultation and diet and exercise consultation, you will have photographs and measurements done before and after your procedure. The laser treatment is administered followed by 10-20 minutes on the vibratory device.

How are the benefits of Lila Laser measured?

Cosmetically speaking, successful treatment is measured in inches rather than pounds. The weight removed is not as important as the improvement in your body’s contour. More important is your improved self-image and self-acceptance.

Is the fat permanently removed?

After our trained staff performs your Lila Laser treatment, the fat thinning is permanent. Should you gain weight, the fat pad will thicken in the areas treated with the laser. For best results, maintain a healthy diet and exercise program. We will guide you along the way. At Plastikos you have the added advantage of our extensive training in holistic medicine and we have judiciously chosen a select few nutritional supplements at the proper dosages to expedite your weight loss and fat burning process.

To find out if you could benefit from body contouring with Lila Laser,
Make an appointment with our staff for your complimentary consultation.
The Sirius Balance Pendant is the latest Zero Point Global Pendant and is the most advanced pendant to date. With 248 frequencies embedded, this will take the concept of balance and energy to a whole new level. Using Sirius Technology, the Sirius Balance Pendant will adapt to your current environment and delivers balanced frequencies to your body as needed.

The Sirius Balance Pendant has been reported to enhance cognitive function and sense of purpose. It is particularly useful for enhanced intuition, direct perception and inner communication. The Sirius Balance Pendant clears static in the body caused by environmental pollution and emotional trauma. Some may experience mild emotional detox as the static is cleared from the body. This is necessary for improved emotional balance and conscious creation.

This is the pendant that Dr. Kolb has selected to wear.

The Sirius Balance Pendant is for sale for only $359.00 and is on display in our lobby.

Zero Point Red and Green Lasers

Red has 60 blueprint frequencies and Green has 98. Infused into the light, these frequencies match the frequencies found in various organs and systems in the body. These vibrations/frequencies help bring the body into balance and helps boost the immune system so that the body can heal itself. Many chiropractors, for instance, use the red laser instead of physical adjustments for back alignment.
Explantation sites all over the internet are giving incomplete and incorrect information. Many self proclaimed experts of these sites give medical and sometimes legal advice that does not benefit patients ill from defective breast implants. These support group "leaders" do not understand the complexity and the different types of diseases their readers are dealing with. Every week I received phone calls from patients who had explantation elsewhere and are now more ill than prior to explantation due to lack of the proper surgery and especially the proper treatment of co-infections and attention to detoxification and immune and endocrine support during surgery. Some have had significant bleeding and or clotting as their surgeons do not understand this disease of bio-toxins and high cardioliopins. Some have adrenal crises due to lack of adrenal support during surgery. Most are out of money and now cannot afford the correct treatment.

Using an en bloc technique:
The myth of the en bloc explantation is distorted in many sites. En bloc is only needed for ruptured silicone explantations and is often not possible due to scarring of the capsule to the chest wall. Also, no sites mention the importance of removing silicone laden axillary lymph nodes which are defective and carry the risk of lymphoma (especially in textured implants) and cancer due to the carcinogens in the silicone. Patients do not regain their health with these lymph nodes still in the body as there is a significant amount of silicone left behind.

The auto-immune factor:
Defective silicone implants cause an autoimmune disease due to chemical toxicity in some patients with genetic tendencies usually very soon after the implants are placed. These patients should never have silicone including fabric softeners and skin care products with Dimethicone, or they can develop diseases such as Hashimoto's thyroiditis.

One third (33%) of the population has a detoxification defect that is usually genetic. When the chemicals start to leak out of silicone implants (usually after trauma or in about eight years due to a lipolysis (a breakdown of lipids) reaction of the shell), these patients become ill with a fibromyalgia type illness with high yeast levels due to a T cell immune problem. Silicone implants should be changed out every eight years to prevent this problem in all patients per Dow Corning engineering data. Patients may also develop an endocrine and neurological disorder from this leakage.

Defective saline implants often become contaminated with mold and one fourth (25%) of the population cannot get rid of mold bio-toxins. They develop a fibromyalgia type illness as well called Sick Building Syndrome. Older saline implants start to break down and the patients can also develop chemical toxicity. Textured implants (silicone or saline) break down and clog up the lymphatic system to a greater degree than smooth implants.

Effective Treatment:
One needs to determine the type of toxicity before treatment may begin. These are the following toxicities: silicone, chemical, bio-toxins, and heavy metal toxicity. Treatment of these breast implant related illnesses and toxicities need to be treated for the patient to recover. Only doctors educated in Integrative Holistic Medicine are able to treat these patients in my clinical experience.

Co-infections including bacterial, mold, yeast, viral, parasites, and intracellular infections also need to be treated for the patient to recover. Over half of the patients have an intracellular mycoplasma or spirochete (these cause RA, Lyme's disease, interstitial cystitis, MS, and other significant chronic fatigue illnesses).

CONTINUES ON NEXT PAGE.................
Anti-fungals must be given around the time of surgery usually for several months on a rotating basis due to the development of fungal resistance to these drugs. We are dealing with mold spores in the chest wall and natural treatments are not effective. Anti-viral and anti-parasitic treatments are often needed in my patients. Untreated parasite infections predispose patients to cancer later in life.

Both intracellular infections (the basis of our biological warfare system) and mold bio-toxin diseases are politically incorrect, so very few doctors understand their treatment. Also, long term antibiotics for intracellular infections usually cannot be given to breast implant patients due to a problem with yeast overgrowth. Special programs usually natural treatment and electromagnetic treatments are needed.

Cancer Risks:

Patients also have an increased risk for cancer that needs to be addresses. Repair of the T cell immune system as well as observation of any moles that may be changing is important in this patient population. Anti-parasitic treatments are also needed to prevent cancer later on.

Patients after explantation have an increased risk of both breast cancer and fibrocystic breast disease (due to removal of the pressure from the implants). This needs to be addressed by treating the cause of fibrocystic disease including estrogen dominance, iodine deficiency, and toxic chemical effects often from the implant breaking down.

Summary

In summary, the correct surgery, including total capsulectomy, removal of silicone laden axillary lymph nodes and other silicone deposits in the breast, along with endocrine and immune support, anti-fungals around the time of surgery, treatment of co-infections, and the proper detoxification is needed for women to regain their health from defective breast implants.
